

```
prior_hessian::detail  
::make_adapted_bounded  
_dist_tuple
```

```
graph LR; A["prior_hessian::detail  
::make_adapted_bounded  
_dist_tuple"] --> B["prior_hessian::make  
_adapted_bounded_dist"]
```

A diagram illustrating a function call. On the left, a gray rectangular box contains the text `prior_hessian::detail::make_adapted_bounded_dist_tuple`. A blue arrow points from the right side of this box to the right side of a white rectangular box on the right. The white box contains the text `prior_hessian::make_adapted_bounded_dist`.

```
prior_hessian::make  
_adapted_bounded_dist
```
