

```
prior_hessian::Composite  
Dist::ComponentDistAdaptor  
< Dist, meta::EnableIfSubclassT  
< Dist, UnivariateDist > >::append  
_global_lbound
```

The diagram consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box has a light gray background and contains a complex C++ template expression. The right box has a white background and contains a simplified version of the expression. The arrow indicates a transformation or simplification process.

```
prior_hessian::Composite  
Dist::lbound
```
